

AN AMENDED RESOLUTION BY CITY UTILITIES COMMITTEE

A RESOLUTION AUTHORIZING THE MAYOR TO ISSUE A NOTICE TO PROCEED TO ARCADIS/BINDLEY, PIETERS & ASSOCIATES, JV, FOR FC-7619-03A, ANNUAL CONTRACT FOR ARCHITECTURAL AND ENGINEERING SERVICES FOR WATER UTILITY LOCATION SERVICES, ON BEHALF OF THE DEPARTMENT OF WATERSHED MANAGEMENT, IN AN AMOUNT NOT TO EXCEED ONE MILLION THREE HUNDRED SIXTY ONE THOUSAND NINE HUNDRED DOLLARS AND NO CENTS (\$1,361,900.00); ALL WORK WILL BE CHARGED TO AND PAID FROM FUND, ACCOUNT AND CENTER NUMBER 2J01 (WATER AND SEWER FUND) 524001 (CONSULTANT/PROFESSIONAL SERVICES) Q42001 (ENGINEERING PLANNING AND DESIGN); AND FOR OTHER PURPOSES.

WHEREAS, the City of Atlanta ("City") did enter into FC-7619-03A, Annual Contract for Architectural and Engineering Services; and

WHEREAS, the Commissioner of the Department of Watershed Management requires Architectural and Engineering Services for Water Utility Location Services in an amount not to exceed One Million Three Hundred Sixty One Thousand Nine Hundred Dollars and No Cents (\$1,361,900.00); and

WHEREAS, the Commissioner of the Department of Watershed Management and the Chief Procurement Officer have recommended that Arcadis/Bindley, Pieters & Associates, JV provide Architectural and Engineering Services for Water and Sewer Utility Locator Services.

THE CITY COUNCIL OF THE CITY OF ATLANTA, GEORGIA, HEREBY RESOLVES, that the Mayor is authorized to issue a Notice to Proceed to Arcadis/Bindley, Pieters & Associates, JV ("Arcadis/BPA") for FC-7619-03A, for Architectural and Engineering Services for Water Utility Locator Services in an amount not to exceed One Million Three Hundred Sixty One Thousand Nine Hundred Dollars and No Cents (\$1,361,900.00).

BE IT FURTHER RESOLVED, that the Chief Procurement Officer is directed to prepare an appropriate agreement to be executed by the Mayor.

BE IT FURTHER RESOLVED, that all contracted work will be charged to and paid from Fund, Account and Center Number 2J01 (Water & Sewer Fund) 524001 (Consultant/Professional Services) Q42001 (Engineering Planning & Design).

BE IT FINALLY RESOLVED, that the Agreement will not be binding on the City and the City will incur no obligation or liability under it until it has been executed by the Mayor, attested to by the Municipal Clerk, approved as to form by the City Attorney and delivered to Arcadis/BPA.

RE: LEGISLATIVE REQUEST
FC-7619-03A, Task Order – Utility Location Services
Contractor: Arcadis/Bindley Pieters & Assoc/JV

Please prepare the appropriate legislation for Cycle 14 (August 21, 2006)

By copy of this correspondence we are forwarding the original requisition to the Department of Procurement, who (after legislative approval) will prepare the appropriate agreement for execution and encumber the funds.

If you have any questions concerning this matter, please feel free to contact Sabrina D. Watts, Watershed Manager, at (404) 330-6955, George Barnes, Deputy Commissioner, at (404) 609-6708, or Willie Canidate, Contracting Officer, Sr., at (404) 330-6335.

Your assistance in this matter is requested and appreciated.

ROBERT J. HUNTER
COMMISSIONER

To: Sheila C. Pierce, Deputy Commissioner
Department of Watershed Management

From: George D. Barnes, P.E., Deputy Commissioner
Department of Watershed Management

Subject: FC-7619-03A, Arcadis/Bindley Pieters & Associates, A JV – A/E Services Proposal
Water and Sewer Utility Location Services

Date: April 26, 2006

Attached is a proposed scope and budget submitted by Arcadis/Bindley Pieters & Associates, JV for A/E services required for the subject project as requested by the Department of Watershed Management

The proposed scope and budget has been reviewed by the DWM Project Manager, Peter Tinibu and me. In our opinion the scope and budget is appropriate for the project and it is recommended that it be submitted to the Department of Procurement for authorization by the Mayor and City Council.

The project is to provide on call services to locate City owned water and sewer lines as required by State of Georgia law.

The current cost to the City for water location services as provided by Utilquest is \$22.50 per locate ticket. Based on our projections of 93392 locates to be provided for the next 12 month period the total cost to the City under the agreement with Utilquest would be \$2,101,132.00. The current cost to the City for sewer locates under the annual agreement with HDR is \$11.50 per locate ticket. Based on our projection of 56773 sewer locates to be provided for the next 12 months, the cost to the City under the agreement with HDR would be \$652,778.

The total cost projected for water and sewer locates for the next 12 month period, under the current agreements with Utilquest and HDR, would be \$2,754,022.

Based on the proposal from Arcadis/Brindley Pieters, the cost for the projected number of water and sewer locates for the next 12 month period would be \$1,481,300.00.

Please note that the proposal from Arcadis/Brindley Pieters includes a one time cost of \$399,000 for the first year for equipment and set up of the system. This one time cost is included in the projected first year cost of \$1,481,300. All equipment and locate systems provided by Arcadis/Brindley Pieters will be the City's property and available to DWM should we decide to have locates provided by City staff in the future.

After the first year, the projected annual 12 month cost for water and sewer locates based on the number of locates for both water and sewer as listed above would be \$1,082,250.

The City will realize approximately \$1,273,000 in savings for water and sewer locates for the first year of service under the proposal from Arcadis/Brindley Pieters and approximately \$1,672,00 per year thereafter.

It is our recommendation that the attached proposal from Arcadis/Brindley Pieters be submitted to DOP for authorization of a Task Order by the Mayor and Council in the amount of \$1,481,300. The cost of the services should be allocated to the appropriate water and wastewater systems accounts as follows:

Water Locates - \$921,264

Sewer Locates - \$560,036

If you have any questions or need any additional information please let me know.

cc: Peter Tinubu

Subject:
Facility Locating Services
City of Atlanta Department of Watershed Management

WATER RESOURCES

Dear Mr. Tinubu:

Date:
April 28, 2006

ARCADIS/BPA, Joint Venture (ARCADIS/BPA) is pleased to submit this proposal to provide facility locating services in accordance with the enclosed specifications dated January 26, 2006 and subsequent discussions with you. In these discussions, you requested that ARCADIS/BPA provide a proposal for water facility locating services on the basis of setting up and developing the program working from the City of Atlanta Department of Watershed Management (DWM) facility at 651 14th Street, NW. The program would have two City of Atlanta DWM employees integrated into our team's field locate crews. This project will be performed under the City of Atlanta Annual Contract. This proposal presents our understanding of the project, scope of work with changes from the January 26, 2006 specifications identified, project team, proposed schedule, and fee for completing the project.

Our ref:
2006-059

Project Understanding

The purpose of the proposed locating services is to provide a means for the City of Atlanta DWM to respond to a Notice of Excavation (NOE) issued by the Utilities Protection Center (UPC) to identify and/or mark the locations of the City of Atlanta DWM domestic water service related underground facilities. (This proposal does not include sanitary sewer or storm sewer related underground facilities.) DWM currently is accomplishing the specified work through the use of consultants. The City of Atlanta Ticket Volume Spreadsheet (Attachment B) represents the type and distribution of NOE responses received and addressed by DWM over the past year and is the basis for determining the fees outlined in this proposal. The City of Atlanta DWM intends to become more involved in the process of locating underground domestic water service related facilities. Therefore, DWM has requested that facility locating service operations be developed and executed from a DWM location, implementing a team approach using both ARCADIS/BPA and DWM staff so that resources, records, and underground location skills are more accessible and available to DWM.

Mr. Peter Tinubu
April 28, 2006

Project Approach and Scope of Services

ARCADIS/BPA proposes a three-phase approach to perform the utility locating services:

- Phase 1 – Mobilization, Transition, and Training
- Phase 2 – Base Operations
- Phase 3 – Field Utility Locate Services

Phases 1 and 2 represent the approach of using DWM facilities and two DWM staff members to make up two field locate crews, which is different than Section II, items 2.01 and 2.03 of the enclosed specifications. The following describes our approach and scope for performing the work.

Phase 1 – Mobilization, Transition, and Training

The mobilization/transition phase would involve the purchase, installation, and testing of computer systems and locate equipment, development and verification testing of base operations and field procedures, and the mobilizing and training of both base operations and field utility locate crews. Equipment, computers, and training would be supplied for the two participating DWM staff.

Computer hardware and software installed at DWM facilities and all special field locate equipment, including miscellaneous expendables such as marker paint and flags, purchased for both ARCADIS/BPA and DWM staff would be City of Atlanta DWM-owned materials and equipment. Therefore, DWM would have, in its inventory, the computer network and operating systems for the facility locate operations. See attached estimate, which includes a schedule of proposed materials and equipment.

An experienced ARCADIS/BPA information technology (IT) person in coordination with a DWM IT person would install a standalone computer server, software, and network at the DWM 14th Street facilities capable of managing the data for the facility locating services. DWM would need to provide a means for a high-speed internet connection to the "utility locate network," including the fees associated with maintaining an internet service over the duration of the program. KUDZU is the software ARCADIS/BPA utilizes for managing facility locate data and is proposed for use on this project. The KUDZU software program would be purchased with DWM named as owner of the software. The KUDZU program requires a \$500.00 to \$600.00 user service fee, which allows the software to be installed on an unlimited number of computers and covers the cost of any KUDZU software updates. DWM would need to maintain the user service fee for the duration of the program. The ARCADIS/BPA IT person will also set up the seven field laptop computers and train staff in the use of the utility locate network and computer systems.

A temporary transition team consisting of experienced ARCADIS/BPA utility locate personnel is proposed to efficiently accept water main utility locate responsibility

Use or disclosure of information contained on this sheet is subject to the restriction and disclaimer located on the signature page of this document.

Mr. Peter Tinubu
April 28, 2006

from the current DWM consultant. The use of an experienced transition team would minimize the risk of disruption of water main locate services and minimize schedule impacts. This transition team would be responsible for mentoring and training permanent ARCADIS/BPA and DWM staff as they are assembled into the program over the mobilization period. The transition team would consist of an experienced utility locate supervisor/manager, two utility locaters, and one utility data clearance administrator on a full-time basis for approximately three months to kick off the project and train permanent staff.

The cost for services, materials, equipment, and direct expenses for this phase would be reimbursed in accordance with the fee schedule in the ARCADIS/BPA contract.

Phase 2 – Base Operations

Base operations would involve screening NOEs, assigning and scheduling the work for the water main utility locaters, quality control, NOE closeout, record keeping, and general utility locate staff supervision. The base operation services would be performed by ARCADIS/BPA staff located at the DWM 14th Street facility, which would be used as the central operations base for the utility locate field staff.

DWM facility requirements for this program would include a minimum of two personnel offices, access to a gathering space for utility locate staff, and an air-conditioned lockable space for a self-contained computer network server. The ARCADIS/BPA staff proposed to be located at the DWM facility include a utility locate supervisor and one NOE/data clearance administrator. The utility locate supervisor would perform as a backup utility locator on an as-needed basis to fill in during staff vacations and to assist when workload and schedule dictate. The NOE data would be managed with the KUDZU program. Overall project management/administration, computer network support and maintenance, and operations quality control would be performed by personnel from the ARCADIS/BPA Atlanta area Vinings office.

The cost for this service would be reimbursed based on the number of NOEs issued to the City of Atlanta by the UPC.

Phase 3 – Field Utility Locate Services

The field utility locate services would be performed by a team of both ARCADIS/BPA and DWM staff consisting initially of four one-person ARCADIS/BPA utility locate crews and two one-person DWM utility locate crews. Each ARCADIS/BPA crew would be equipped with a cell phone and a vehicle, including vehicle gas, maintenance, etc. Special locate equipment, a laptop computer, and software are to be supplied by DWM as part of and as defined in the mobilization phase.

Mr. Peter Tinubu
April 28, 2006

The cost for providing the necessary field locators will be on a per-ticket-marked basis in accordance with the DWM specifications identified in the DWM request for proposal, plus monthly wireless subscriptions and expendables such as paint, markers, miscellaneous tools, etc. invoiced at cost.

Deliverables

1. An operating standalone facility locate computer network consisting of two workstations, a printer, a server, and associated software and data, located at the DWM 14th Street facilities. The data will include the NOE closeout records identified in the request for proposal specifications.
2. Seven Internet-ready, web-based laptop computers configured for use by field utility locators.
3. Seven sets of field locate equipment, including miscellaneous tools, supplies, etc. as required for a utility locator to perform water structure locate responsibilities.
4. Yearly NOE closeout records in accordance with specification Section II, Item 2.06.

Project Team

ARCADIS/BPA staff consisting of personnel from both ARCADIS and Brindley Pieters & Associates will team with City of Atlanta DWM staff in accordance with the responsibilities outlined below.

- ARCADIS will provide project management, mobilization/training support, utility locate crew supervision, and two crew members. Roman Gau and John Scioscia will oversee the mobilization of the project and will function as technical resources relative to the water service infrastructure and information and data available for locating water mains and structures. Andrea Davis, an experienced utility locate supervisor/manager, David Miller and James Skelly, both experienced utility locators, and Heidi Heinisch, an experienced utility data clearance administrator, will be assigned to the transition team during the mobilization period. Andrea Davis will oversee the entire water main utility operation for the duration of the program. See attached résumés.
- Brindley Pieters & Associates will provide project management, mobilization/training support, NOE/data clearance administration, and two crew members.
- The City of Atlanta DWM will provide City of Atlanta program management and two crew members.

Mr. Peter Tinubu

This proposal and its contents shall not be duplicated, used, or disclosed—in whole or in part—for any purpose other than to evaluate the proposal. This proposal is not intended to be binding or form the terms of a contract. The scope and price of this proposal will be superseded by the contract. If this proposal is accepted and a contract is awarded to ARCADIS/BPA as a result of—or in connection with—the submission of this proposal, ARCADIS/BPA and/or the client shall have the right to make appropriate revisions of its terms, including scope and price, for purposes of the contract. Further, client shall have the right to duplicate, use, or disclose the data contained in this proposal only to the extent provided in the resulting contract.

Mr. Peter Tinubu
April 28, 2006

Schedule

ARCADIS/BPA has prepared this proposal on the basis of performing ongoing work for three years, which is the approximate duration of the current ARCADIS/BPA contract assuming the one-year options are exercised. The mobilization, transition, and training phase is scheduled for approximately three months.

Fee

ARCADIS/BPA proposes to complete the work described in this proposal in accordance with the following:

- | | |
|--|--------------------------------|
| Phase 1 – Mobilization, Transition, and Training | not-to-exceed fee of \$383,000 |
| Phase 2 – Base Operations | \$3.00/ticket issued by UPC |
| Phase 3 – Field Utility Locate Services | |
| I. Price Per Locate | \$15.00/locate |
| Normal Hours 7:00 a.m. – 5:00 p.m. | |
| Monday through Friday | |
| II. Price Per Locate | \$20/locate |
| After Hours 5:01 p.m. – 6:59 a.m. (Callout) | |
| Monday through Friday and Holidays | |
| III. Standby Request, Hourly Locates | |
| Investigation, and Testimonial..... | \$75.00/hour |
| (Per Hour) | |

After-hour callouts will be billed at a minimum of two hours. Work performed is defined as locating work performed before 7:00 a.m. and after 5:00 p.m. Monday through Friday, or at any time on Saturdays, Sundays, or holidays. The City must approve all callout work done on an hourly basis, except emergency callouts.

A breakdown of our estimated hours and fees is enclosed.

ARCADIS/BPA appreciates this opportunity to work for the City of Atlanta. Please call us if you have any questions or comments.
